

# Report scraping Singapore

Today's date: 2024-01-14

Welcome to our web application, a powerful tool that scrapes news websites to bring you the most relevant and trending information. Our application dives deep into the vast ocean of online news content and extracts the most used keywords to give you a clear picture of what's happening around the world. The data table you see below is the result of our sophisticated analysis. It shows the most frequently used keywords across different websites, providing a unique insight into the topics that are currently dominating the news landscape. Each row in the table represents a keyword, while the third column provide detailed information about the keyword's frequency, the news sites where it's most commonly found, and its overall popularity. Explore the table, discover the trends and dive into the stories that matter most to you. Happy exploring!

index	Keyword	Count
1	us	33
2	singapore	24
3	taiwan	20
4	china	19
5	2024	17
6	2023	13
7	new	12
8	inflation	11
9	world	9
10	election	8
11	dollar	8
12	billion	7
13	film	6
14	india	6
15	market	6

Welcome to the histogram view of our data table. This visual representation shows the top 15 most used keywords from different news sites, ranked from the highest to the lowest number of hits.

This concludes our brief analysis for our programming languages assignment. It's important to realise that the keywords presented here are based on a limited amount of information. The reality we perceive through the Internet is often a condensed version of the real world, and this application is no exception. While our tool provides valuable insights, users should be aware that it represents only a fraction of the vast information landscape. Always remember to approach online information with a critical mind and an understanding of its inherent limitations. Thank you for using our application!
